Is this training right for you?
Review these networking assessments:
Fundamentals & Advanced

WHAT OTHER STUDENTS ARE SAYING

"Having taken a networking class before, it was great to have the information delivered in a new manner. I was able to ask more advanced questions about networking, and the answers were **broken down in terms and language anyone would understand**."

"The blend of instructional segments with interactive Q&A helped us understand the materials. The practical information from the training has already **helped me become a better systems engineer and integrator**."

"Josh is extremely knowledgeable and passionate about all things networking. Further, he is a great teacher and does a really good job of explaining concepts in a way that everyone can understand. I have probably **learned more about networking from Josh in a week-long training session than I have in my 15-year electrical career**."

"Would highly recommend this training to anyone troubleshooting or configuring controls networks. The class was presented in a very structured and easy-to-understand way. **Exactly what I was needing**."

REGISTRATION CLOSES on or before October 31, 2023.
